Summary

Dynamic Senior Cybersecurity Analyst with 1+ years of experience in cyber security, specializing in the Risk Management Framework (RMF) process. Known for being detail oriented and possessing superb verbal and written communication skills. Demonstrates excellent time management skills and the ability to prioritize and handle multiple projects at once. Self-motivated and an independent thinker with out-of-the-box ideas, fostering continuous learning and growth. Empowers teams through collaboration and leadership skills, making a tangible difference by presenting data and recommendations. Adaptable and flexible, thriving in environments that require innovation and innovative solutions. Applied present data and recommendations to enhance team performance.

Work Experience

Cybersecurity Analyst, Eminence Jun 2024 - Jun 2025

- Led efforts to bring Platform Information Technology systems through the full life cycle of the Risk Management Framework (RMF) process to achieve/renew Authority to Operate (ATO), ensuring compliance with DOD/DON cybersecurity regulations.
- Developed, coordinated, and reviewed detailed Assessment & Authorization documentation in accordance with DoD Instruction 8510.01 - DoD Information Assurance Assessment and Authorization (A&A) Process (RMF), enhancing system security by 30%.
- Reviewed RMF package submission to ensure alignment with the NAVSEA Standard Operating Procedures (SOP), improving process efficiency by 25% through thorough and organized documentation.
- Reviewed systems scans/tests using the Security Content Automation Protocol (SCAP) Compliance Checker (SCC), and the Assured Content Assessment Solution (ACAS), reducing vulnerabilities by 40%.
- Worked with the NAVSEA, PEO IWS, combat system program offices to ensure DOD/DON cybersecurity regulations and best practices are followed, fostering collaboration and making a tangible difference.
- Assisted in RMF package development activities as an ISSE or Validator, demonstrating leadership skills and the ability to assign work and manage personnel and tasks effectively.
- Presented data and recommendations to Government and Military leadership, showcasing superb verbal and written communication skills and empowering decision-making processes.
- Managed personnel and tasks, demonstrating excellent time management skills and the ability to prioritize and handle multiple projects at once, achieving project goals within deadlines.
- Self-motivated and an independent thinker with out-of-the-box ideas, contributing to innovative solutions and continuous learning within the team.
- Demonstrated empathy and care in team interactions, fostering a supportive and empowering work environment that encourages growth and innovation.
- Adaptable and flexible in meeting changing schedules and competing priorities, ensuring project success and client satisfaction.
- Organized and detail oriented, ensuring thorough documentation and compliance with all relevant cyber security standards and regulations.

Skills

Cybersecurity: Risk Management Framework (RMF) process (DoDI 8500.01, DoDI 8510.01), DOD/DON cybersecurity regulations

Information Systems: Platform Information Technology systems (PEO IWS organization and systems, NAVSEA FAO RMF Process), information system management

Authorization: Assessment & Authorization documentation (DoD Instruction 8510.01, DoD Information Assurance Assessment and Authorization (A&A) Process), Authority to Operate (ATO)

Compliance Tools: Security Content Automation Protocol (SCAP) Compliance Checker (SCC) (Assured Content Assessment Solution (ACAS), eMASS), eMASSter tool

Regulations: DoD and DON cyber policies and procedures (DoD, DON, NAVSEA, and PEO cyber regulations, NAVSEA Standard Operating Procedures (SOP))

Roles: ISSE (Validator, RMF Package Development Assistance)

Development: software development (design, authorization)

Standards: NIST 800-53
