Summary

Dynamic Senior Cybersecurity Analyst with 1+ years of experience in cyber security, specializing in Risk Management Framework (RMF) processes. An independent thinker and self-motivated professional, adept at providing cybersecurity expertise to surface combat system program offices. Demonstrated ability to assign work and manage personnel and tasks, ensuring compliance with DOD/DON cybersecurity regulations. Known for innovative solutions and out-of-the-box ideas, with superb verbal and written communication skills. Committed to continuous learning and making a tangible difference through collaboration and empowering teams. Organized, detail oriented, and adaptable, with excellent time management skills. Demonstrated care in professional environments. Demonstrated empathy in professional environments. Applied present data and recommendations to enhance team performance. Demonstrated flexible in professional environments.

Work Experience

Cybersecurity Analyst, Eminence Jun 2024 - Jun 2025

- Led efforts to bring Platform Information Technology systems through the full life cycle of the Risk Management Framework (RMF) process to achieve/renew Authority to Operate (ATO), demonstrating Leadership skills.
- Developed, coordinated, and reviewed detailed Assessment & Authorization documentation in accordance with DoD Instruction 8510.01, ensuring thorough compliance with cybersecurity standards.
- Reviewed RMF package submission to ensure alignment with the NAVSEA Standard Operating Procedures (SOP), showcasing excellent time management skills and ability to prioritize tasks.
- Provided cybersecurity expertise to surface combat system program offices, empowering teams to adhere to DOD/DON cybersecurity regulations and best practices.
- Reviewed systems scans/tests using the Security Content Automation Protocol (SCAP) Compliance Checker (SCC), and the Assured Content Assessment Solution (ACAS), ensuring systems' security integrity.
- Worked with the NAVSEA, PEO IWS, combat system program offices to ensure DOD/DON cybersecurity regulations and best practices are followed, fostering collaboration and making a tangible difference.
- Assisted in RMF package development activities as an ISSE or Validator, demonstrating adaptability and flexibility in dynamic environments.
- Managed personnel and tasks, demonstrating ability to assign work effectively and handle multiple projects at once, ensuring organized and efficient operations.
- Presented data and recommendations to Government and Military leadership, utilizing superb verbal and written communication skills to influence decision-making.
- Implemented innovative solutions and out-of-the-box ideas to enhance cybersecurity measures, contributing to the growth and innovation of the organization.
- Maintained a detail oriented approach to cybersecurity tasks, ensuring thorough and accurate execution of responsibilities.
- Demonstrated self-motivation and independent thinking in driving cybersecurity initiatives, contributing to the continuous learning and development of the team.
- Enhanced security protocols, resulting in a 20% reduction in potential vulnerabilities across monitored systems, showcasing a proactive approach to cybersecurity.

Skills

Cybersecurity Frameworks: Risk Management Framework (RMF) process (DoD Instruction 8510.01, DoDI 8500.01), NIST 800-53

Cybersecurity Tools: Security Content Automation Protocol (SCAP) Compliance Checker (SCC), Assured Content Assessment Solution (ACAS)

Cybersecurity Processes: Assessment & Authorization documentation (NAVSEA Standard Operating Procedures (SOP), DoD Information Assurance Assessment and Authorization (A&A) Process)

Cybersecurity Regulations: DOD/DON cybersecurity regulations (DoD and DON cyber policies and procedures, DoD, DON, NAVSEA, and PEO cyber regulations)

Cybersecurity Roles: ISSE, Validator

Cybersecurity Systems: Platform Information Technology systems, PEO IWS organization and systems

Cybersecurity Software: eMASS, eMASSter tool
