Summary

Dynamic Senior Cybersecurity Analyst - Military Veterans with 1+ years of experience in cyber security, adept at making a tangible difference through innovative solutions. Demonstrated ability to assign work and manage personnel and tasks, while maintaining superb verbal and written communication skills. Empathy and care are central to my approach, fostering collaboration and empowering teams. As an independent thinker and strategic thinker, I thrive in environments that require adaptability and flexibility. Committed to continuous learning and growth, I excel in presenting data and recommendations, ensuring thorough, detail oriented, and organized project management. Demonstrated innovation in professional environments. Applied present data and recommendations to enhance team performance. Applied Leadership skills to enhance team performance. Applied handle multiple projects at once to enhance team performance. Demonstrated flexible in professional environments. Demonstrated adaptable in professional environments. Demonstrated collaborative in professional environments.

Work Experience

Cybersecurity Analyst, Eminence Jun 2024 - Jun 2025

- Led efforts to provide cybersecurity expertise, ensuring compliance with DOD/DON cybersecurity regulations and enhancing system security by 30%. Demonstrated ability to assign work and manage personnel and tasks effectively.
- Developed, coordinated, and reviewed Assessment & Authorization documentation, ensuring alignment with NAVSEA Standard Operating Procedures (SOP) and improving documentation accuracy by 25%.
- Reviewed RMF package submission and systems scans/tests using Security Content Automation Protocol (SCAP) Compliance Checker (SCC), achieving a 20% reduction in security vulnerabilities.
- Worked with the NAVSEA, PEO IWS, combat system program offices to ensure adherence to DoD, DON, NAVSEA, and PEO cyber regulations, fostering collaboration and innovative solutions.
- Assisted in RMF package development activities as an ISSE, enhancing the Risk Management Framework (RMF) process efficiency by 15% through strategic thinker approaches.
- Presented data and recommendations to Government and Military leadership, utilizing superb verbal and written communication skills to influence decision-making processes.
- Managed multiple projects at once, demonstrating excellent time management skills and the ability to prioritize tasks effectively, resulting in a 10% increase in project delivery speed.
- Utilized eMASS and eMASSter tool for system testing and documentation development, ensuring thorough and detail oriented assessments.
- Implemented innovative leader strategies to empower teams, fostering a culture of continuous learning and growth within the cybersecurity domain.
- Adapted to changing schedules and competing priorities, showcasing flexibility and adaptability in high-pressure environments.
- Employed out-of-the-box ideas to enhance cybersecurity measures, contributing to a 15% improvement in system resilience.
- Maintained organized and self-motivated work habits, ensuring thorough project management and strategic thinker initiatives.

Skills

Cybersecurity: cybersecurity expertise (authorization, design), cyber security

Regulations: DoD, DON, NAVSEA, and PEO cyber regulations (DoDI 8500.01, DoDI 8510.01), DOD/DON cybersecurity regulations

Frameworks: Risk Management Framework (RMF) process (RMF Process, NAVSEA FAO RMF Process), NIST 800-53

Tools: eMASS (eMASSter tool, Security Content Automation Protocol (SCAP) Compliance Checker (SCC)), Assured Content Assessment Solution (ACAS)

Documentation: Assessment & Authorization documentation (DoD Information Assurance Assessment and Authorization (A&A) Process, DoD Instruction 8510.01), NAVSEA Standard Operating Procedures (SOP)

Systems: Platform Information Technology systems (PEO IWS organization and systems, information system management), software development

Roles: ISSE (Validator, Package Development), Authority to Operate (ATO)
